**QUESTIONS AND ANSWERS #1**  
**14 AUGUST 2014**

1. QUESTION: We have applied for and received reciprocity with a number of states including California, and with the NRC. Does this meet the requirement to have both CA and NRC broad scope licenses?

RESPONSE: The synopsis states ...” Prime contractors proposing on this requirement **must possess a Nuclear Regulatory Commission (NRC) Broad Scope License and California Agreement State License Broad Scope Radioactive Material License (RML)** that allows handling and storage of byproducts, source, and special nuclear material.” The synopsis SUBMISSION REQUIREMENTS states ... “Provide copies of NRC Broad Scope License, and California Agreement State License Broad Scope Radioactive Material License.”

2. QUESTION: What states besides California, does NAVFAC SW consider as part of the "Western United States"?

RESPONSE: Western States include: California, Arizona, Nevada, Colorado, Washington, Alaska, and Oregon.
